(54) Title: A CAMERA WITH A DELAYED SHUTTER RELEASE FUNCTION

(57) Abstract: A system for controlling the delayed shutter release function comprises a physical separate processing unit (COM) and camera (CAM) which supplies images to the processing unit (COM) to be displayed on a display screen (DS), a hardware or software shutter release button (HSRB; SSRB) is provided, which, when activated by a user, triggers the start of a delay period, a communication link (CL) between the camera (CAM) and the processing unit (COM) allows exchange of control information between the camera (CAM) and the processing unit (COM) to control the delayed shutter release function.
